**How to use this enema:**

- REMOVE ORANGE PROTECTIVE SHIELD FROM ENEMA COMFORTIP® BEFORE INSERTING.

- With steady pressure, gently insert enema tip into rectum with a slight side-to-side movement, with tip pointing toward navel. Insertion may be easier if person receiving enema bears down, as if having a bowel movement. This helps relax the muscles around the anus.
- Do not force the enema tip into rectum as this can cause injury.
- Squeeze bottle until nearly all liquid is gone. It is not necessary to empty the bottle completely, as it contains more liquid than needed.
- Remove Comfortip® from rectum.
- Retain enema in accordance with doctor's instructions.

**Follow with a cleansing enema:**  
To remove stools or other residue now softened and lubricated, it is suggested that you use a regular Fleet® enema to cleanse the bowel.

**Positions for using this enema:**

- **Left-side position:** Lie on left side with knee bent, and arms resting comfortably.

- **Knee-chest position:** Kneel, then lower head and chest forward until left side of face is resting on surface with left arm folded comfortably.
